Work Experience

Feb 2023 - Now

Full Stack Engineer **at Logigroup**

Casablanca, Morocco - Hybrid

- **Frontend Development with Angular:** As a frontend developer at the company, I was responsible for creating responsive user interfaces using Angular. This involved developing, testing, and maintaining web components, ensuring a seamless user experience across devices and browsers.
- **Interface Design and Logic Integration:** My tasks included designing user-friendly interfaces and integrating complex business logic into the frontend of the website. This involved translating design mockups into functional web components and ensuring a smooth interaction between users and the application, ultimately improving the overall user experience on the project's website.

Jul 2022 - Dec 2022

Full Stack Engineer **at Rumzer**

Lodi, Wisconsin - Remote

- **User Interface Development:** Created and maintained responsive user interfaces using Angular, ensuring a visually appealing and seamless user experience.
- **Database Schema Modeling:** Designed and implemented database schema models on the backend to optimize data storage and retrieval, improving system efficiency.
- **Testing and Quality Assurance:** Conducted thorough testing of both frontend and backend components, including unit and integration testing, to identify and rectify issues, ensuring a robust and error-free application.

Feb 2022 - May 2022

Full Stack Engineer **at Box Analytics**

Casablanca, Morocco

- During my time at Box Analytics (Aikyo now) I hosted, maintained, and deployed a React-based application while also contributing to the initial development phases of a web-based back office system, enabling efficient client mobile app management.

Dec 2021 - Feb 2022

Full Stack Engineer **at FinaMaze**

Casablanca, Morocco

- I played a vital role in enhancing the back office management of FinaMaze's primary application, made valuable modifications to their main site, and diligently documented articles to facilitate collaboration with future partners and collaborators.

May 2021 - Nov 2021

Full Stack Engineer **at Um6p**

Benguerir, Morocco - Remote

- During my UM6P internship, I played a pivotal role in creating a full-stack app from scratch to efficiently manage catering services at a local hospital, enhancing service quality and operational efficiency.
